Professional Summary

Passionate web developer with a strong focus on building modern, responsive, and interactive web applications. I enjoy blending technology and creativity, bringing ideas to life through clean, efficient code paired with thoughtful, user-centered design. Whether it's crafting intuitive interfaces or developing scalable features, I aim to create experiences that are both functional and visually engaging.

Technical Skills

Languages/Frameworks: PHP, C#, JavaScript, ASP.NET Core (.NET 6),

Frontend: Bootstrap, Tailwind CSS, DataTables.js, React (basic), Flutter (basic)

Database & Backend: MySQL, SQL Server, Modular MVC, AJAX

Tools: Git/GitHub, Visual Studio, VS Code, Figma

Other: RESTful APIs, QR Code Integration, UX Design

Projects

Library Management System – DepEd San Pablo (Internship)

Lead Developer

February 2025 – June 2025

- Spearheaded full-cycle development of an LMS adopted by school administrators, reducing manual tracking by 80%.
- Integrated Argon2id hashing for user authentication, improving data security.
- Engineered a bulk upload feature to process multi-sheet Excel files, saving hours of manual input.
- Built a real-time notification system for borrowing events across Admin/User tiers.
- Developed a reporting dashboard with filters, overdue tracking, and status tabs for optimized inventory management.

PWD Discount Monitoring System (Capstone)

System Developer

February 2024 – January 2025

- Developed a full-stack web app using ASP.NET Core MVC, automating PWD registration, validation, and discount transactions.
- Designed a QR Code scanning system to digitize medical and commodity discounts, cutting manual effort by 100%.
- Built an analytics dashboard to monitor status and trends across user accounts.
- Implemented workflow automation (expiry, archiving, ID generation, email alerts), improving efficiency by over 60%.
- Created a complaints and feedback module to streamline establishment violation reports, reducing admin response time.

Education
